\* The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons the chief amongst which are the following:—  
 (1) the administrative reports relate exclusively to forests worked by the Forest Department whilst the agricultural returns include in addition forest areas cultivated by district officers, and (2) certain village and other lands not covered by forests worked by the Forest Department and not used as forest lands but used as agricultural lands are treated as forests in the returns.
